RE: 63-1595, Cert. a1313

Dear Mr. and Mrs. Hansen:

The approval of the above referenced water right for your irrigation well indicated that you install a permanent totalizing meter on the well. The purpose of this meter is to regulate the amount of water that you can divert from the underground aquifers for irrigation purposes.

A recent inspection of your well by Commissioner Ray Owens indicated that the totalizing meter was not functioning. I am taking this opportunity to request that you take immediate action to correct this problem.

I will expect the meter to be operational before you divert any more water from the well this irrigation season. I would also request that you notify Mr. Owens at 527-3269 and inform him of the approximate amount of water that has been diverted from the well thus far for this irrigation season.

If you have any questions concerning this matter please do not hesitate to contact this office.

Sincerely,

M. Stanley Adams, P.E.
Area Engineer
